**Regulation of the Peabody Board of Health  
Restricting the Sale of Tobacco Products  
and Nicotine Delivery Products**

**A. Statement of Purpose:**

Whereas there exists conclusive evidence that tobacco smoking causes cancer, respiratory and cardiac diseases, negative birth outcomes, irritations to the eyes, nose and throat<sup>1</sup>;

Whereas among the 15.7% of students nationwide who currently smoke cigarettes and were less than 18 years old, 14.1% usually obtained them by buying them in a store (i.e. convenience store, supermarket, or discount store) or gas station<sup>2</sup>;

Whereas nationally in 2009, 72% of high school smokers and 66% of middle school smokers were not asked to show proof of age when purchasing cigarettes<sup>3</sup>;

Whereas the U.S. Department of Health and Human Services has concluded that nicotine is as addictive as cocaine or heroin<sup>4</sup>;

Whereas despite state laws prohibiting the sale of tobacco products to minors, access by minors to tobacco products is a major public health problem;

Whereas many non-cigarette tobacco products, such as cigars and cigarillos, can be sold in a single “dose;” enjoy a relatively low tax as compared to cigarettes; are available in fruit, candy and alcohol flavors; and are popular among youth<sup>5</sup>;

Whereas according to the CDC’s youth risk behavior surveillance system, the percentage of high school students in Massachusetts who reported the use of cigars within the past 30 days went from 11.8% in 2003 to 14.9% in 2009<sup>6</sup>;

Whereas in Massachusetts, youth use of all other tobacco products, including cigars, rose from 13.3% in 2003 to 17.6% in 2009, and was higher than the rate of current cigarette use (16%) for the first time in history<sup>7</sup>;

Whereas nicotine levels in cigars are generally much higher than nicotine levels in cigarettes<sup>8</sup>;

Whereas non-residential Roll-Your-Own (RYO) machines located in retail stores enable retailers to sell cigarettes without paying the excise taxes that are imposed on conventionally manufactured cigarettes. High excise taxes encourage adult smokers to quit<sup>9</sup> and high prices deter youth from starting.<sup>10</sup> Inexpensive cigarettes, like those produced from RYO machines, promote the use of tobacco, resulting in a negative impact on public health and increased health care costs, and severely undercut the evidence-based public health benefit of imposing high excise taxes on tobacco;

Whereas educational institutions sell tobacco products to a younger population, who are particularly at risk for becoming smokers and such sale of tobacco products and nicotine delivery products are incompatible with the mission of educational institutions that educate a younger population about social, environmental and health risks and harms;

Whereas research has shown that raising the minimum legal drinking age to 21 has reduced alcohol consumption among youth and protected drinkers from long-term negative outcomes in adulthood, including alcohol and other drug dependence<sup>11</sup> ;

Whereas more than 80 percent of all adult smokers begin smoking before the age of 18; and more than 90 percent do so before leaving their teens;<sup>12</sup>

Whereas in a lab analysis conducted by the FDA, electronic cigarette cartridges that were labeled as containing no nicotine actually had low levels of nicotine present in all cartridges tested, except for one;<sup>13</sup>

Now, therefore it is the intention of the Peabody Board of Health to regulate the sale of tobacco products and nicotine delivery products.
